EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Fogarty on 10/13/04.

The application has been amended as follows:

In The Abstract

In the abstract, the recitation "In a flip-flop ... can be reduced." on lines 2-12 has been changed to:

--In a flip-flop circuit which includes an input section using a dynamic circuit and an output section using a static circuit and which captures data during a period of a pulse width shorter than a clock cycle, the number of transistors, circuit area and power consumption are reduced. In FIG. 1, an output signal of an inverter circuit INV1 constituting a latch circuit 2 connected to the output terminal of an input section 1 is used as an input signal of a control section 3. Thus, a control signal output from the control section 3 to the input section 1 is stabilized, thereby suppressing unnecessary operation of circuit elements and reducing unnecessary power consumption. In addition, the configuration of the control section 3 is simplified. As a result, the number of transistors constituting the circuit and the circuit area can be reduced.--

Reasons For The Above Change

The original abstract contain two paragraph, so the above change has been made to rewrite the abstract in a single paragraph to meet the proper format. No text has been changed.

REASONS FOR ALLOWANCE

2. Claims 1-10 are allowed.

Claims 1 and 2 are allowed because the prior art of record fails to disclose or suggest a flip-flop including a control section and an output section in combination with other elements with the recited connections and operations set forth therein.

Claims 3, 5, 7, and 9 are allowed because they depend on claim 1.

Claims 4, 6, 8 and 10 are allowed because they depend on claim 2.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
